

The Digilink is a portable load cell package combining high quality, accuracy and reliability in a compact low weight unit; the Digilink is supplied complete with a remote hand held display/control module, 10metres lead, leather carry case, battery charger and test certificate all housed in a rugged waterproof case.

Typical applications:

- Crane and Winch load measurement
- Monitoring the tension when pulling pipes or cables
- Monitoring the pull when extracting piles or shuttering
- Proof testing anchor points, slings, strops etc
- Checking test weights, test rigs etc.

Key features of the 205 series include:

- Simple & easy to use with 10mm digits on the display
- Low weight
- Accurate in a wide range of temperatures
- Load Hold & Tare functions
- Displays in pounds or kilograms
- NiCad batteries provide 10 hour continuous use
- Low battery warning with automatic power down
- Rugged carry case with pressure balancing valve

### Key Benefits

- Portable
  - Low weight ~ Our 12 tonne unit weighs less than 2kg!
  - Accuracy ~ 0.20%
  - Available in cable & wireless versions
  - For greater precision our 'S' type sensors are available, ranging from 10 to 5,000kg
- accuracy: +/- 0.030% of applied load (Cable only)
