

The standard range of LOADWISE overhoist limit switch kits are a reliable and inexpensive solution to the majority of Anti 2 block (overhoist) conditions; hardwire cable and telemetry (wireless) versions are available to suit your requirements. For hazardous atmosphere areas e.g. petrochemical and offshore applications, a range of Exi / Exd models are available (ATEX).

Key Benefits

- A comprehensive range of models

- Supplied with all mountings

- Easy to install, supplied with all necessary fittings

- Reliability

- Low cost
